

## Annalisa Parziale

European Project Assistant  
[NetEC Net European Consulting](#)  
Brussels, Belgium

After a Master degree in International Relations at the Orientale University of Naples, I embarked on a new journey where I had the opportunity to work at NGO, Public and Private Bodies where I started getting in touch with European Project Management field.

After that, I chose to complete my European Project experience attending the first edition of the Master in European Project Management organized by Pixel in 2012-2013.

I must admit **the Master was very well organized and focused programme**. It gave me a great deal of knowledge and gained huge insight into the field of European Projects Management and Planning. I found the Master has inestimable value for my career, due a practical approach, professional tools and delivered by an International teaching staff.

It gave me a great opportunity for an international internship at the University of Hull. Great experience. I supported the finalization of an Interim Report for a European project and worked with one of the Work Package leaders in the construction of a business plan for the exploitation activities at transnational level.

After my internship, in December 2013 I landed in Brussels where **I worked as European Project Assistant for a company named Enco Consulting** based in Brussels.

Later **I was offered a job, as European project assistant, at NetEC Net European Consulting, in Brussels where I have now been working for two and a half years.**

I really want to thank you again and I am more than satisfied with the Master and its Super Staff!!!

Brussels, July 2017
