

Ruzha Likja

Executive Coordinator
Creative Business Solutions
Tirana, Albania

I have pursued Law studies at Faculty of Law, University of Tirana. Being fully committed to experience a different challenging field beside law, I attended the fourth edition of the Master in European Project Planning and Management organized by Pixel in Florence, Italy in 2015-2016.

The Master course was very well organized and structured, a good combination of lectures and practical activities. It was **a great opportunity to acquire skills and competences** in project writing and management and to meet personalities working in EU bodies and successful in their paths. A key to success was also building a strong network with teachers and colleagues.

Internship opportunities in different companies, organizations and universities were presented to all Master students. I choose to have my internship experience at Building und Projekt Netzwerk in Gottingen, Germany. BupNet is a company with more than 20 years'

experience in project management and implementation. I had the chance to contribute mostly in project writing, budget drafting, work with many project management tools under ERASMUS + and Interreg NW. **At the end of the three months internship, I was proposed a contract to continue working and experiencing project management, so I continued for a while my project career in Germany.**

I continued my professional experience in my country, Albania, as a Project Developer at the Regional Economic Development Agency, public Agency dealing with big investment projects with major impact in Albania development.

Nowadays, I am working in the **quality of Executive Coordinator at CBS Creative Business Solution**, a business consulting and project implementation organization operating in Albania.

The Master Course in Florence offers two great things that everyone can profit in such a short time: knowledge and experience. If you are keen on investing in a fruitful experience I would recommend this master course due to all benefits you will have not only during the course but also for your future career.

Tirana, May 2017
